New Distribution Warehouse & Offices - for Kiowa Ltd, Sleaford, Lincs.

Following Kiowa's launch of their e-commerce venture, their storage, distribution and manufacturing requirements have grown exponentially, alongside their over the counter service and sales.

brp have been engaged to design their new flagship premises on the family owned business park on the outskirts of Sleaford.

The proposals are for a two storey, 750sqm retail, office and telesales facility fronting a 2400sqm distribution warehouse, with second phase expansion capacity of 1200sqm.

The main manufacturing facility is formed around traditional long span shallow pitched steel portal frames with composite cladding to the walls and roof, the latter containing significant roof glazing.

The continued use of prefabricated modular materials, but of a significantly better quality and with a distinct appearance, ensure high quality appearance of the retail and office accommodation that is accessible to the general public.
