New Primary Care Centre - Lytham St. Annes, Lancashire

An award winning Primary Care Centre forming the centerpiece of wider redevelopment proposals for Lytham Hospital, Lancashire. The scheme not only fulfills the primary objective of delivering a bespoke building without compromising the ongoing operations of the hospital elsewhere on site, but also was successful on many other levels.

A multi-user facility comprising two GP surgeries, pharmacy and healthy-eating café. These are underpinned by extensive PCT services including; diagnostics, minor op's

suite, Community Team and Health Port.

The modern design complements the immediate context and makes references to the history of the locality, in particular the former Victorian Hospital. This is achieved through the use of a traditional palette of materials and colour scheme, albeit assembled in a contemporary manner, together with reclaimed artefacts from the original hospital.
